

# Perennial Hardwood

*Providing a more sustainable approach to hardwood floor refinishing, installation and repair.*

## Finish Options

### Natural Finish

- One coat of a clear, amber, or oil colored sealer
- Two coats of a two-component, water-based commercial finish
- Available in matte, satin, and semi-gloss
- Exceptional scratch and scuff resistance
- Cost-effective system that allows for future “screen and coats”
- Low VOCs
- Non-yellowing finish

### Custom Stain

- Custom-mixed stain samples on location
- Water-based stain sealer to enhance color
- Two coats of a two-component, water-based commercial finish
- Available in matte, satin, and semi-gloss
- Exceptional scratch and scuff resistance
- Cost-effective system that allows for future “screen and coats”
- Low VOCs
- Non-yellowing finish

### VOC Free Finish and Custom Stain

- All natural, 0 VOC finish
- Excellent water resistance
- Increased anti-slip
- Natural matte appearance
- Ideal for high traffic, or commercial areas
- Easy DIY repairs
- Custom-mixed stain samples on location
- Exceptional scratch and scuff resistance
- Non-yellowing finish

Per the industry standard, we provide 3 coats of water-based finish with all finish options (with or without stain). This approach ensures durability, achieving the desired look, and maintaining any warranties.

Commercial grade water-based finish offers far superior durability versus residential single-component finish. This system ensures a longer lifespan between refinishing and maintenance coats. All finish options include full dust containment; certified dustless machines typically collect 90-95% of dust, therefore additional masking will be provided throughout the working area. All finish options include the cleaning of walls and shelves in the area that sanding occurred. The coating process averages between 1 and 2 days in duration. During dry time, occupants must vacate the home for an average of approximately 3 hours per coat. Overnight relocation will not be required, occupants may sleep in the home throughout the entire refinishing process.
